Super **LIGHT** for easier refueling

WEH® TK26 CNG

WEH® TK26 CNG

SUPER LIGHT for easier refueling

The WEH® TK26 CNG has been developed specifically for fast filling of buses and trucks at self-service fueling stations. The considerably improved ergonomics contribute to the ease of operation.

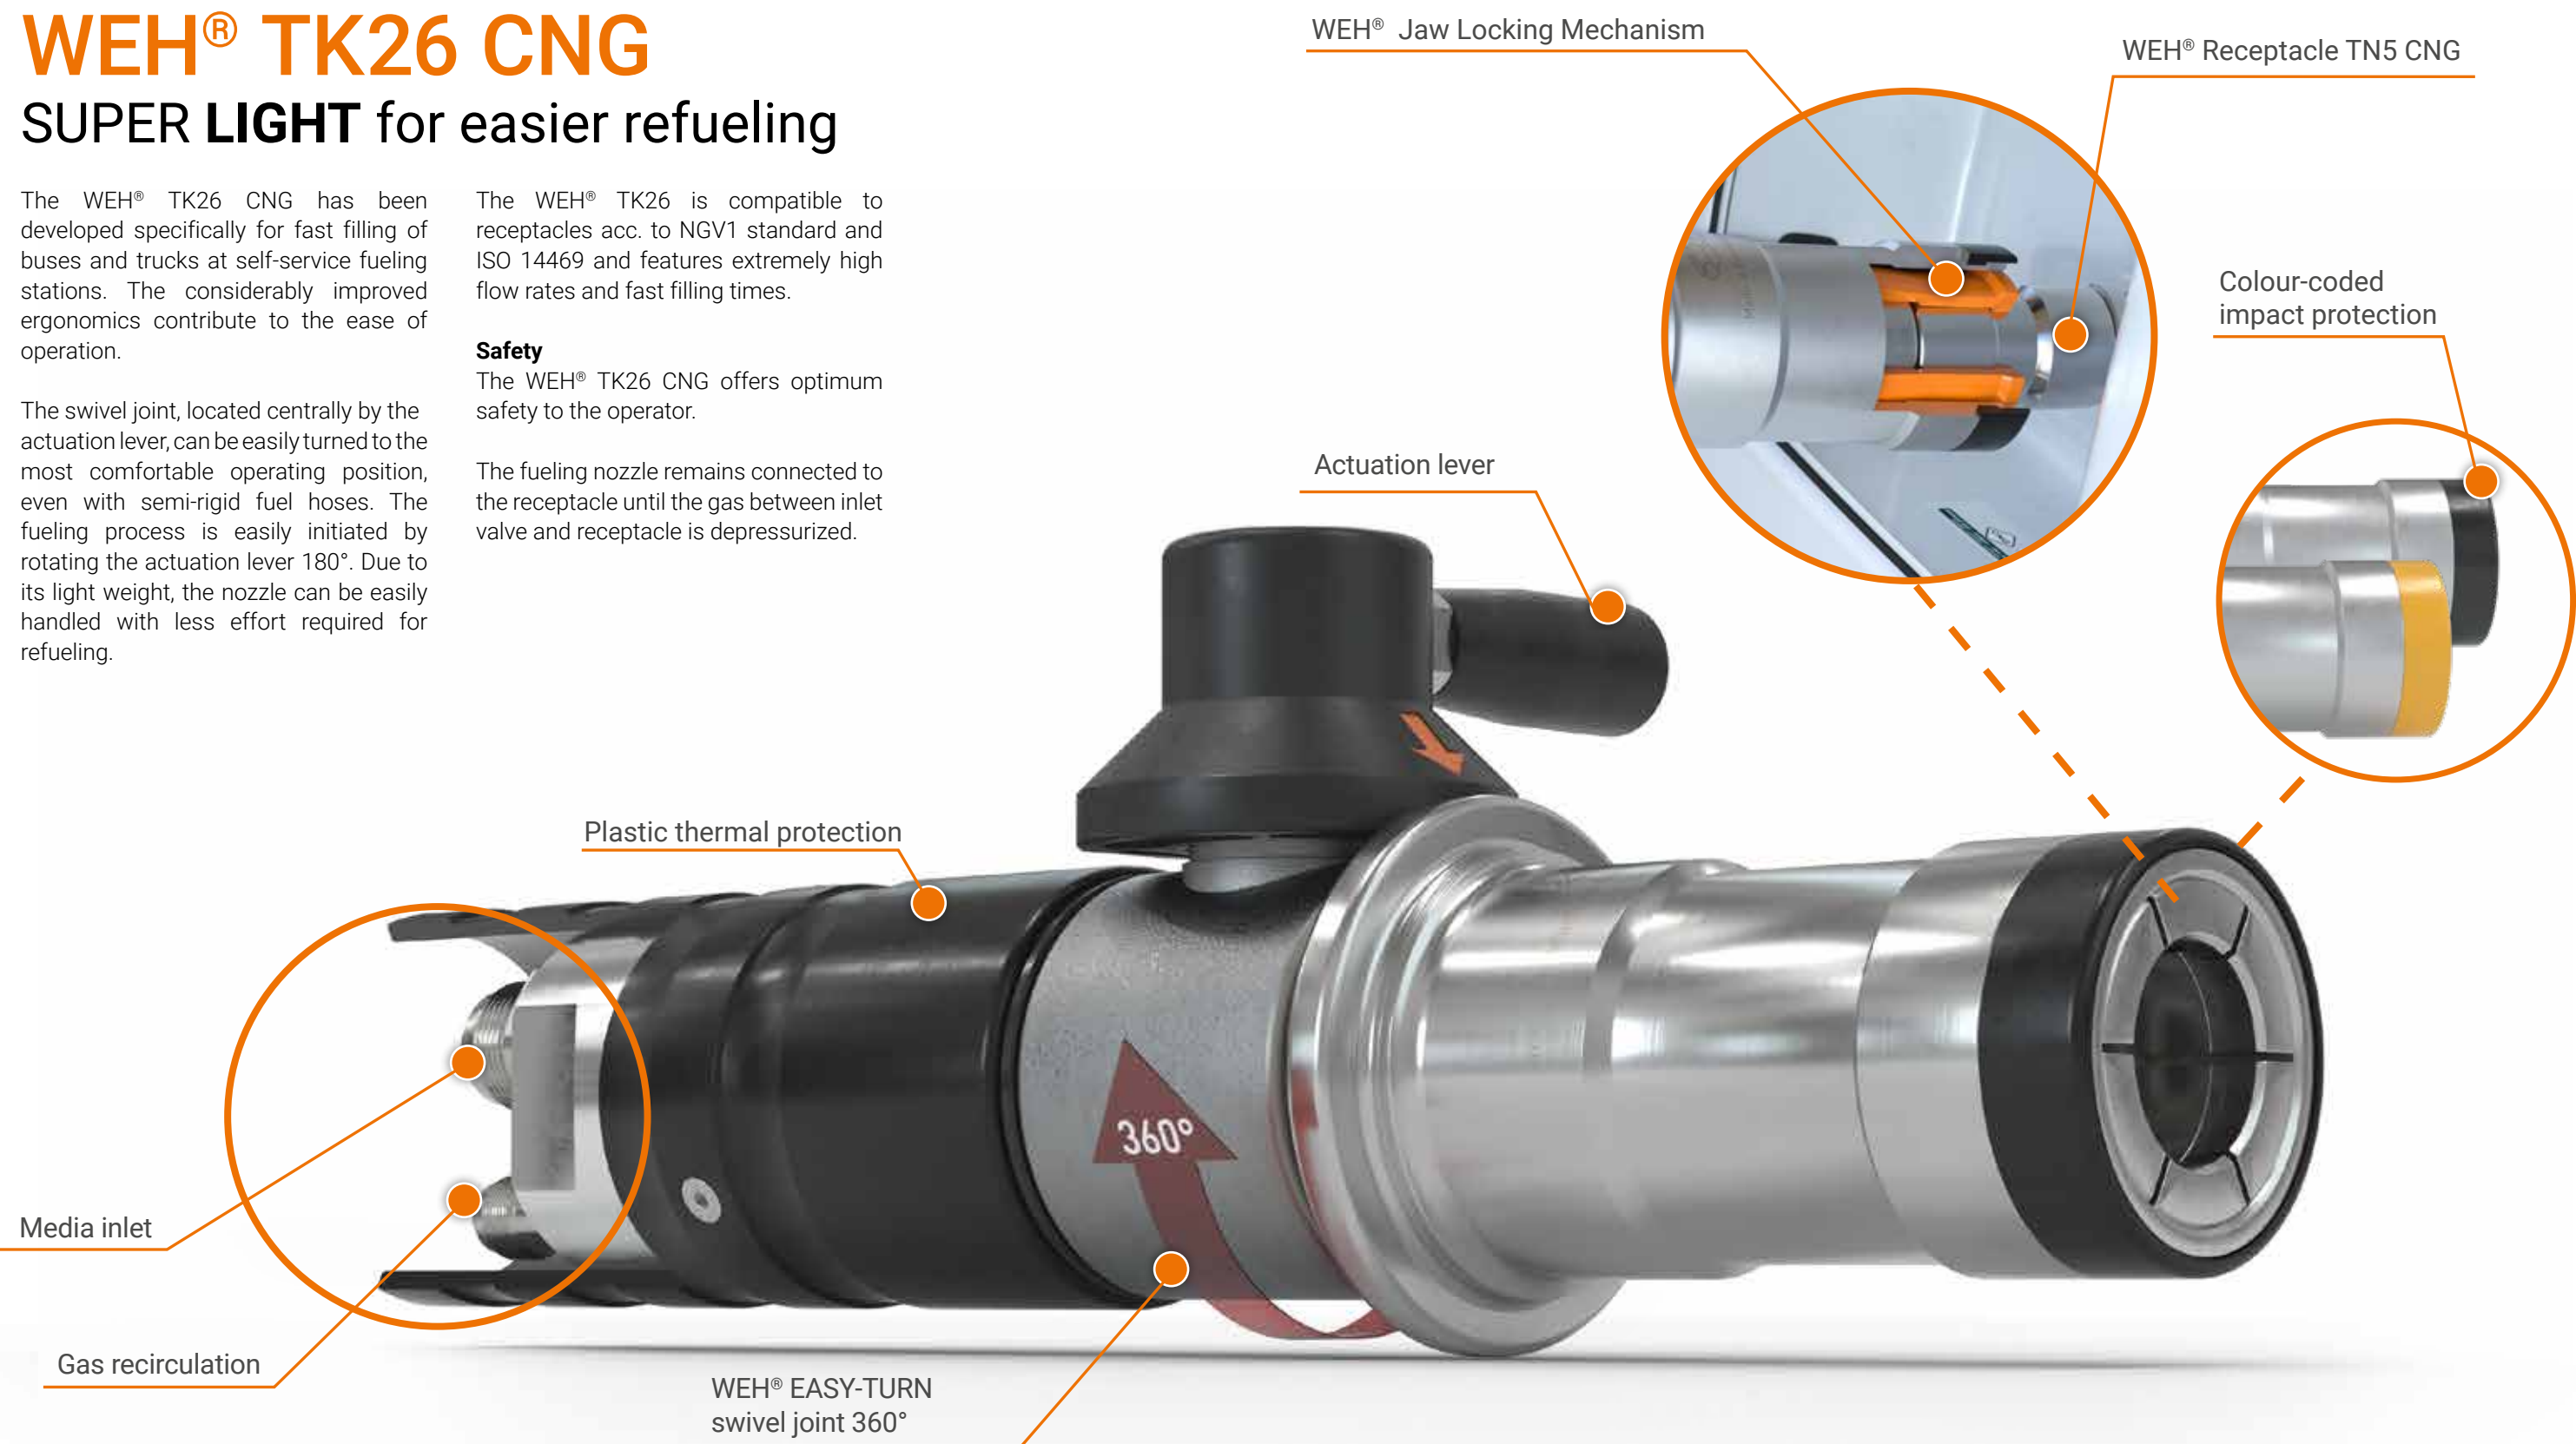

The swivel joint, located centrally by the actuation lever, can be easily turned to the most comfortable operating position, even with semi-rigid fuel hoses. The fueling process is easily initiated by rotating the actuation lever 180°. Due to its light weight, the nozzle can be easily handled with less effort required for refueling.

The WEH® TK26 is compatible to receptacles acc. to NGV1 standard and ISO 14469 and features extremely high flow rates and fast filling times.

Safety

The WEH® TK26 CNG offers optimum safety to the operator.

The fueling nozzle remains connected to the receptacle until the gas between inlet valve and receptacle is depressurized.

TECHNICAL DATA

- | | |
|--------------------------------------|--|
| 1. Application: | CNG fast filling of buses and trucks at self-service fueling stations compatible with receptacles acc. to NGV1 standard and ISO 14469 |
| 2. Pressure range: | P30HD acc. to ANSI NGV1 / C200 acc. to ISO 14469
PN = 200 bar (3,000 psi) PS = 300 bar
P36HD acc. to ANSI NGV1 / C250 acc. to ISO 14469
PN = 250 bar (3,600 psi) PS = 350 bar |
| 3. Temperature range: | -40 °C up to +85 °C |
| 4. Conformities / Tests / Approvals: | In accordance with ISO 14469 |
